

# CSC 110 — Lab 1

Name: \_\_\_\_\_ Date: \_\_\_\_\_

---

---

1. What is the appropriate relationship of the HTML, HEAD, and BODY tags? (You can give a short example as your answer.)
2. Where should the TITLE tag appear? (Consider the structure you provided as the answer to the first question.)
3. What happens in the TITLE tag appears in a different part of the HTML page?
4. What happens if there is more than one TITLE tag within the HTML page?
5. What is the effect of omitting the closing paragraph `<P>` tag?
6. What is the effect of omitting the closing heading level 1 `<H1>` tag?
7. Give an example of a tag, an attribute, and a value in HTML. (Think of this as three (3) questions that can be answered using a single example. Label the tag, attribute, and value.)
8. Give two examples of block (line) formatting tags.
9. Give two examples of character formatting tags.
10. Can a tag have more than one attribute specified? (If “yes”, give an example; if “no”, give a counter-example.)
11. Do attributes appear in the closing tag? (Give an example.)
